

NATNAEL YIRGA MERI

Addis Ababa, Ethiopia | +251 905 410 217 | natidotnet@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Backend Developer with 3.5+ years of experience building secure, scalable backend systems using ASP.NET Core and Clean Architecture. Experienced in designing high-performance Web APIs, handling complex remittance service workflows, and integrating international card payment gateways (MasterCard MPGS, Visa CyberSource) alongside national platforms (Telebirr, CBE Birr). Skilled in developing maintainable, production-ready solutions that handle real-world cross-border traffic at scale while adhering to modern software architecture, PCI-DSS security standards, and engineering best practices.

CORE TECHNICAL SKILLS

Languages: C#, Rust, SQL, TypeScript, JavaScript

Backend & Web Frameworks: ASP.NET Core, Web API, Minimal APIs, Axum (Rust), Entity Framework Core, Tokio, toasty, sea-orm

Architecture & Patterns: Clean Architecture, Modular Monolith, Microservice, Domain-Driven Design (DDD), CQRS, SOLID Principles, RESTful API Design

Databases & Storage: PostgreSQL, MySQL, Redis, CouchDb

Integrations & Messaging: Payment Gateways (MPGS, CyberSource), RabbitMQ, Quartz.NET, Hangfire

DevOps & Tools: Git, Azure DevOps (CI/CD Pipelines), Docker, Linux, CI/CD (GitHub Actions, Gitlab), Postman

PROFESSIONAL EXPERIENCE

.NET Backend Developer — Arifpay Financial Technologies

Addis Ababa | Jul 2025 – Present

- Design and develop secure backend services and API infrastructure for fintech platforms serving global remittance providers, local merchants, and internal systems.
- Integrate international payment gateways including MasterCard Payment Gateway Services (MPGS) and Visa CyberSource to process secure cross-border card payments and tokenization workflows.

- Architect and optimize high-concurrency remittance backend service engines, facilitating seamless cross-border payout distribution, real-time FX currency conversions, and local bank/wallet settlements.
-

.NET Backend Developer — Appdiv Systems

Addis Ababa | Apr 2023 – Jul 2025

- Co-engineered backend APIs for the Oromia Civil Registration System (OCRA), serving 350+ regional offices.
 - Integrated external government and enterprise services, designing robust data synchronization protocols across distributed databases.
-

KEY PROJECTS

Production & Enterprise Systems

- **ArifRemit** | arifremit.com
 - **Tech Stack:** ASP.NET Core, C#, Web API, Entity Framework Core, PostgreSQL
 - High-concurrency backend services for instant cross-border money transfer, managing real-time currency conversions and compliance processing.
- **ArtsPlus Streaming Backend** | artsplus.tv
 - **Tech Stack:** .NET Core, Minimal APIs, RESTful Architecture, Redis Caching
 - Scalable streaming platform backend serving high user traffic with low-latency API response times for media content delivery.
- **Arif Merchant App & Dashboard** | merchantapp-dashboard.arifpay.net
 - **Tech Stack:** ASP.NET Core, JWT Auth, Microservices, PostgreSQL
 - Merchant management backend enabling 1,500+ business owners to handle transactions, analytics, and automated daily settlements.
- **Oromia Civil Registration System (OCRA)** | app.ocra.gov.et
 - **Tech Stack:** ASP.NET Core, Clean Architecture, MySQL, Modular Monolith
 - Government-scale public platform deployed across 350+ regional offices, facilitating the issuance of 4,000,000+ digital civil certificates.

Open Source & Personal Projects

- **HuluPay Microservice** | hulupayet.vercel.app
 - Tech Stack: Rust, Axum, Tokio, SQLx, PostgreSQL, WebAssembly
 - High-performance financial platform engineered with Rust and Axum, leveraging asynchronous runtimes for memory-safe concurrency and minimal execution latency.
 - **Afro Message Client** | [GitHub Repository](https://github.com)
 - **Tech Stack:** .NET, C#, Typescript
 - Messaging client integration handling automated OTP delivery and SMS transactional updates.
-

EDUCATION

B.Sc. in Computer Science — Unity University | CGPA: 3.94 / 4.00 | Sep 2018 – Aug 2022
